Quality first, always.

FLSmidth A/S, founded in 1882, is a well - known multinational company in the global mining and cement industries. In the mining sector, its equipment includes crushers like gyratory, jaw, and cone crushers for size reduction; mills such as ball mills and vertical roller mills for grinding ores; and flotation cells for mineral separation. In the cement industry, it offers rotary kilns for pyro - processing, vertical roller mills for raw material and cement grinding, and clinker coolers to enhance energy efficiency. With a long - standing reputation, FLSmidth provides comprehensive solutions from equipment supply to engineering services, aiming to drive sustainable productivity in these industries.

- Crushing
- Classification
- Dewatering
- Feeding and conveying
- Flotation
- Grinding
- Laboratory equipment
- Precious metal recovery
- Pyroprocessing
- Sampling and online analysis
- Screening
- Slurry pumping
