## Amino Acid Granule

### Granular Amino Acid Organic Fertilizer

#### Introduction

Amino acid granule is refined from corn as the major raw material without adding any chemical substances, made through spraying granulation process after the concentration of the bio-fermentation and refinery of MSG extract. It is a new type organic nitrogen fertilizer, and it's harmless, efficient, green organic fertilizer.

#### Guaranteed Analysis

Amino Acid  $\geq$  8-10%  
Humic Acid  $\geq$  10-15%  
N-P-K 16-0-1  
Organic Matter  $\geq$  25%  
Size: 2-4mm  
Black Shiny Round Granule

#### Features

- 1) Provide organic matters, nitrogen, potassium and microelements to the plant.
- 2) Improve soil fertility, promote root growth.
- 3) Increase the utilization of mineral elements.
- 4) Improve drought resisting and disease resistance.
- 5) Increase the yield and quality.

#### Recommended Application

Base fertilizer: 450-750Kgs/Ha  
Top dressing: 600-900Kgs/Ha  
Regulate application amount according to different crops, different growth stages and the local soil and fertilizing habit.

#### Precaution

Please make small scale test before wide-spread application.

#### Packaging

## Technical Data Sheet

---

It is available in 20kg, 25kg, 40kg, 50kg bag or as per request.

### Storage

In a cool and dry place, keep from direct sunlight or frozen.
