

Technical Data Sheet

Humic Acid Powder

Humic Acid Organic Soil Conditioner

Introduction

Humic acid powder is extracted from natural mineral. It has high organic matters, high activity and long-lasting fertilizer efficiency, widely accepted as organic base manure and soil regulator in horticultural crops, fruit trees, landscaping, gardening and pasture.

Guaranteed Analysis

Humic Acid \geq 50-55%

Organic Matter \geq 75%

Moisture \leq 25%

Black Powder

Features

- 1) Increase the utilization of fertilizers effectively in soil, prevent N, P, K from leaching or locking up.
- 2) Optimize soil structure, increase the capacities of the earth water holding, cation exchange and aeration, increase the contents of organic matters in soil.
- 3) Stimulate activities of soil microorganism, reduce pollutants in the soil, adjust the pH value of soil and relieve the harm caused by acid or alkaline.
- 4) Improve root system development, enhance the crop resistance to drought, coldness, diseases, increase crop yield, improve the quality of agricultural products.

Recommended Application

Soil application: 300-450Kgs/Ha or 5-10% of total fertilizer application.

For turf: 200-500Kgs/Ha

For pasture: 300-500Kgs/Ha

Regulate application amount according to different crops, different growth stages and the local soil and fertilizing habit.

Precaution

Please make small scale test before wide-spread application.
